

# The 13 Stages of Telehealth: Entering the Era of Telehealth 2.0

*More Than Just Video*

# Healthcare, Transformed

The rapidly expanding telehealth market carries immense promise: lower costs, greater efficiency, expanded access, and better patient outcomes. However, fulfilling that promise will take more than simple video consultations: Telehealth must transform the entire continuum of care and optimize the patient experience at every stage along the remote care journey.

## TytoCare shows what the next generation of telehealth looks like

A positive customer  
experience

higher utilization than the  
industry standard

shorter visit time

### 450K+

exams in clinical repository  
powering AI diagnostic support

### \$200 Saved

on average per visit

# The TytoCare Suite

## TytoClinic

Turn any point of care into a telehealth clinic

## TytoPro

Extend specialists' reach to home care, schools, and urgent care clinics

## TytoHome

Empower patients to conduct remote exams and monitor blood oxygen levels from the comfort of home

## TytoCare Pulse Oximeter

Remotely monitor blood oxygen levels

LUNGS

EARS

THROAT

HEART

HEART RATE

TEMPERATURE

SKIN

ABDOMEN

# Comprehensive Consumer-Centered Care

In today's rapidly evolving healthcare landscape, it's not enough to apply new technologies to old business models. Here are 3 pillars that will help support the healthcare system of the future.

## Pillar 01

### In Sickness and In Health

Episodic care just won't cut it. In the 21st-century digital economy, consumers expect the healthcare experience to center around the patient -- not their location. This requires clinical-quality care anytime, anywhere, enhanced by holistic, data-driven insights into each patient's unique needs, in sickness and in health.

## Pillar 02

### Inspired Experiences

Whether it's a mouth-watering chicken sandwich or a vacation to remember, the best experiences we have become the yardsticks by which we judge those that follow. Each healthcare journey should be as seamless, efficient, and user-friendly as possible.

## Pillar 03

### Purpose-Driven Innovation

The best healthcare innovators don't just adapt to new trends. They blend theoretical research, industrial applications, and deep consumer insights to develop life-changing products.

# TytoCare's Product Roadmap

Dr. David Shulkin

# The 13 Stages of Telehealth

TytoCare doesn't just stay on top of the latest trends in remote care. We pioneer groundbreaking innovations that keep us ahead of the curve and make life easier for patients and providers alike.

From reimagining urgent care to ushering in a new era of AI-driven medicine, TytoCare's imprint can be found along each of the 13 stages of telehealth outlined by Dr. David Shulkin, the 9th U.S. Secretary of Veterans Affairs and a member of TytoCare's Advisory Board.

## Stage 1

### Episodic Care and Urgent Care

TytoHome empowers patients to avoid unnecessary ER, urgent care, and doctor's office visits with a clinical-grade solution for home-based exams.

## Stage 2

### Continuity of Care/Team-Based Care

Through our HIPAA-compliant, cloud-based TytoVisit platform, physicians can review exams, communicate with patients, conduct live exams, and schedule telehealth visits.

## Stage 3

### Chronic Care Management

Health systems around the world turn to TytoCare for monitoring post-op patients and enhancing care for those with chronic conditions.

## Stage 4

### Device and Technology Integration

Exam data from each TytoCare device is sent to our platform and the patient's EHR, ensuring seamless continuity of care.

## Stage 5

### Self-Directed Care

Home-based exams are a breeze with TytoCare's AI-based guidance technology, which helps each user capture exam data safely and accurately.

### **Provider Decision Support**

On course for FDA clearance in mid-2021, TytoCare's AI-driven diagnostic support solution leverages data from hundreds of thousands of exams and clinical literature to help physicians detect abnormalities in lung exams -- with more applications to come.

### **Interoperability with Community**

Remote - At TytoCare, "Silo" is a truly four letter word. Patient data flows seamlessly from exam devices to our Clinician Dashboard to EHRs, so providers have the insights they need to deliver optimal care.

### **Closing Gaps in Care**

With easy EHR integration, TytoCare provides clinicians with a holistic view of each patient.

### **Personalized Encounters**

TytoCare allows patients to select from from our network of providers or to share with a clinician of their choice.

### **Point of Care Testing**

TytoClinic provides remote point of care locations -- including schools, nursing homes, home care facilities, clinics, employee work sites, urgent care facilities, and pharmacies -- with a comprehensive, turnkey telehealth solution.

### **AI-Enhanced Diagnostic and Therapeutic Accuracy**

Our diagnostic support tool is paving the path toward unprecedented precision and personalization in diagnosis and treatment.

### **Telehealth as GPS Navigation**

With easy integration and interoperability, TytoCare doesn't just offer clinicians a snapshot of where each patient is, but helps them determine where the patient needs to go next.

### **Automation and Genomic Integration**

The coming years will feature rapid advances in biotechnology -- and with TytoCare's cutting-edge technology, telehealth will enter a new era of vast possibilities.
